

Program  
 Auditorium R. Mañé

Time	Monday, 16	Tuesday, 17	
9:00 - 9:30	<p><b>Discussion                      on                      MCA                      09:00 - 12:30</b></p>	The Inverse M-matrix problem J. San Martin	
9:30 - 10:00		A Helly type theorem for abstract projective geometries. Javier Bracho	
10:00 - 10:30		Aproximación racional y ortogonalidad L. R. Piñeiro	
10:30 - 11:00		<b>Break</b>	
11:00 - 11:30		Optimization at 2,800m: Introducing the RGO at EPN-Quito L. M. Torres	
11:30 - 12:00		The algebraic numbers definable in complex exponential fields. A. Onshuus	
12:00 - 12:30		The Affine Bonnet Problem R. Bryant	
12:30 - 14:00	<b>Lunch</b>		
14:00 - 14:30	Dynamical Inclusions in Time Scales: Compactness and Existence of Solutions G. Silva	<p><b>Free</b></p>	
14:30 - 15:00	Universality for Wigner Matrices J. Ramírez		
15:00 - 15:30	Integral methods vs differential methods in invariant theory W. Ferrer		
15:30 - 16:00	<b>Break</b>		
16:00 - 16:30	Geometric structures on nilmanifolds. Some algebraic restrictions. I. Dotti		
16:30 - 17:00	Ramsey properties of sets of real numbers. C. Di Prisco		
17:00 - 17:30	L-functions and random matrix theory B. Conrey		
17:30 - 17:45	<b>Break</b>		
17:45 - 18:00	The Colombian bid C. Montenegro		
18:00 - 18:15	The Mexican bid J. A. de La Peña		
18:30	Coquetel
