

## **ALGA Connections in Spain**

Sebastian Xambó

Catalunya, Spain

### **Abstract:**

In my talk I will comment on (some of) the ALGA activities in Spain and (some of) their connections to Steven L. Kleiman and Aron Simis work and inspiration. These annotations belong to a larger joint project with Antonio Campillo that aims at a deeper and wider survey of ALGA in Spain in the last three decades, but this presentation will be biased toward my personal recollections, with some emphasis in singularities, intersection theory and enumerative geometry.
