

”Algebraic Representation Theory and Applications (ART)”

Olivier Mathieu (Lyon), Vyacheslav Futorny (USP)

The session will focus on recent advances in the representation theory of algebras (Lie, Jordan algebras and their generalizations) and their applications. This area of research is very active both in Brazil and France with existing strong collaboration.

The following speakers are confirmed:

Anne-Marie Aubert (University of Paris P. and M. Curie)
Jethro van Ekeren (UFF)
Philippe Gille (University of Lyon Cl. Bernard)
Reimundo Heluani (IMPA)
Abdenacer Makhlouf (Universit de Haute-Alsace)
Adriano Moura (Unicamp)
Eric Ragoucy (LAPTH, Annecy-le-vieux)
Bertrand Remy (Ecole Polytechnique)
Marc Rosso (University of Paris R. Diderot)
Luis Enrique Ramirez (UFABC)
