

Probability Session for the 1st Joint Meeting Brazil-France in Mathematics

Session organized by:
Rodrigo Bissacot (São Paulo University),
Hubert Lacoin (IMPA, Rio de Janeiro)
and Pierre Picco (Aix Marseille University)

In the past few decades, Probability Theory as a mathematical field grew in importance and came to play a pivotal role in the Brazilian-French collaboration in mathematics.

The Probability Session aims to gather mathematicians which have taken part in this process, with the objective of strengthening existing collaboration, and stimulate the development of new ones.

The session will consist of 10 talks of 40 minutes given by prominent actors of the Brazilian-French collaboration in probability:

- Oriane Blondel (Lyon University)
- Francis Comets (Paris Diderot University)
- Luiz Renato Fontes (São Paulo University)
- Sandro Gallo (São Carlos Federal University)
- Alexandre Gaudillièrre (Aix-Marseille University TBC.)
- Veronique Gayrard (Aix-Marseille University)
- Patricia Gonçalves (IST Lisboa)
- Giambattista Giacomin (Paris Diderot University)
- Stefano Olla (Dauphine University, Paris)
- Ellen Saada (Paris Descartes University)
