

9 – Geometry and Dynamical Systems - Ricardo Mañé Auditorium

Time	Thursday, 18	Friday, 19
14:30 - 15:00	<p>Remi Langevin (Université de Bourgogne) <i>Lenses on very curved zones of a singular line field of \mathbb{C}^2 or of a singular plane field of \mathbb{C}^3</i></p>	<p>Alain Jacquemard (Université de Bourgogne) <i>Effective issues in Non-Smooth System</i></p>
15:10 - 15:40	<p>Marc Soret (Université F. Rabelais) <i>An adjunction formula for surfaces in the 4-ball</i></p>	<p>Daniel Panazzolo (Université de Strasbourg) <i>Discontinuous vector fields: regularization and versatility</i></p>
15:50 - 16:20	<p>Marina Ville (Université F. Rabelais) <i>Local and global topology of minimal surfaces in \mathbb{R}^4</i></p>	<p>Gioia Vago (Université de Bourgogne) <i>On the Ogasa number</i></p>
16:20 - 16:45	Coffee	
16:45 - 17:15	<p>Ronaldo Garcia (UFG) <i>Darboux curves on surfaces</i></p>	<p>Andre Belotto da Silva (Université d'Aix-Marseille) <i>Singular foliations in sub-Riemannian geometry and the Strong Sard Conjecture</i></p>
17:25 - 17:55	<p>Marcos Craizer (PUC-Rio) <i>Quadratic Points in Projective 3-Space</i></p>	Problem and discussion session
18:05 - 18:35	<p>Jorge Sotomayor (Universidade de São Paulo) <i>Principal curvature configurations on surfaces and hypersurfaces in Euclidean spaces</i></p>
