XXVI EBP in honor of Professor Antonio Galves

<u>Posters</u>

Markov approximation for stochastic chains with unbounded memory
Alexsandro Gallo

An Itô-Wentzell formula for rough paths
Alvaro Enrique Machado Hernandez

Poisson processes with catastrophes
Anatoli Iambartsev

Consistent estimation of the number of clusters in a multivariate mixture Gaussian model
Anny Rodrigues

Sparse Markov Models for High-dimensional Inference
Daniel Yasumasa Takahashi

Consensus and loss of trust in social networks: a phase transition
Felipe Penafiel

From stochastic hamiltonian systems to stochastic compressible Euler equation
Jesus Manuel Correa Lora

Detection of synchronization by permutation test and implication for neuroscience experimental design
Josue Tchouanti

Euler-Lagrangian approach to stochastic Euler equations in Sobolev Spaces
Juan David Londoño Acevedo

Look-down construction for a Moran Seed-Bank Model
Julio Ernesto Nava Trejo

Fast Consensus and Metastability in a Highly Polarized Social Network
Kádmo de Souza Laxa
