

The viscoelastic wave equation in the past history framework

Valéria N. Domingos Cavalcanti¹

¹ Universidade Estadual de Maringá - UEM

We study the well-posedness as well as the stabilization of viscoelastic wave equations in the past history framework. We find the origin of modern viscoelasticity in the works of Boltzman [1, 2] and Volterra [5, 6]. It is also important to mention the pioneer work of Dafermos [3].
